

CASE STUDY

# REMOTE LOCATION

SRP Power Plant > Springville, AZ

## THE SCOPE

**\$11.4M**

contract amount

**294,220 SF**

of metal siding

**120,670 SF**

of metal roofing

**20-MEN CREW**

working for 2 years

## THE CHALLENGE

A 2-year power plant project was set 30 miles away from the nearest lodging. We had to think creatively to provide housing for our 20-men crew.

## THE OUTCOME

To assure convenient housing for our crew, CSM purchased land and converted the area to RV lodging. At the time, this was the 2nd largest project CSM has successfully completed. We had over 20 men onsite for over 2 years.
